Integrating Jenkins with Maven

1. In the side navigation bar, click on **Manage Jenkins**.
2. Click on **Tools**.
3. Scroll down to **Maven Installation**.
4. Click on **Add Maven**
5. Enter the Name as **Maven**.
6. Select the **latest version**.
7. Click **Save**.
8. Click on **Create New Item**.
9. Enter the Item Name as **test**.
10. Select **Freestyle Project**.
11. Click **OK**.
12. Leave the default settings and **click Save**.
13. Go to the Dashboard and **click on the test project**.
14. Under **Permalinks,** click on C**onfigure** in the navigation bar.
15. Under the Build section, **select Add Build Step → Invoke top-level Maven targets.**
16. Under Maven Version, select **Maven** and enter **package** as the goal.
17. Click **Save**.
18. Click **Build Now**.
19. Once the build completes, you should see a "**Build Success**" message.
20. Check the **console output**.
